Project

Chat-App

A chat application makes it easy to communicate with people anywhere in the world by sending and receiving messages in real time. With a web or mobile chat app, users are able to receive the same engaging and lively interactions through custom messaging features, just as they would in person.

Dress-Suggestion

Where users can select and save their favourites and also can do add their own dress.the four basic operations a Web application should be able to perform Create, Read, Update, and Delete. In such apps, users must be able to create data, have access to the data in the UI by reading the data, update or edit the data, and delete the data.
